WORKSPACES**

Scalable. Sustainable. Secure.

# We Solve Business Problems

**Centralized & Secure IT**

**Predictable Pricing**

**Collaboration Ready**

**Scalability & Support**

# Work Without Limits

## AEC-Optimized Cloud Workspaces

AEC firms work in multiple locations, with distributed teams requiring powerful GPU-Accelerated workstations to design, collaborate, and share confidential data in real time. They need a reliable and secure solution.

IronOrbit's GPU-Accelerated **INFINITY Workspaces**, recognized in Gartner's 2021 Market Guide for DaaS, are built exclusively on Nvidia's leading-edge RTX technology to deliver the best-in-class DaaS experience, protected by next generation cybersecurity tools.

# Workspace Types

POWERED BY

Application Optimization

## Premier Edition

Fast, affordable cloud-based workspaces for your day-to-day applications.

## Bronze Edition

**GPU-Accelerated.** Increased power for your 2D graphics-rich software, photo editing, & more. Collaboration ready.

## Gold Edition

**GPU-Accelerated.** For your 3D graphics intensive workloads, video editing, CAD, BIM software, & more.

*Including Premier & Bronze Applications*

## Titanium Edition

**GPU-Accelerated.** For your high-powered 3D rendering applications. ML, VR simulation, & more.

*Including Premier, Bronze & Gold Applications*

Application Optimization in addition to...

Application Optimization in addition to...

ArcGIS Pro

IronOrbit **INFINITY Workspaces** are built from the application backward to ensure optimal performance and end-user experience making the Titanium and Gold editions perfect for engineers and architectural designers.

**Desktop-as-a-Service** delivers lightning-fast and secure access to applications and files.

There's a good reason why AEC firms and enterprises are adopting DaaS...

**Because it works.**

# Features

The background features a complex architectural wireframe of a building structure. It includes various lines, planes, and perspective drawings. There are several technical annotations: a curved arrow pointing downwards with the text '3.00 m' next to it, and another '3.00 m' label near the bottom left. Faint, illegible text is scattered throughout the wireframe, including 'POST-POST GLIDEM AN' at the top right and 'AD ALIENELLA SSIVIE MACIS ELUM GUM ET P.' at the bottom left.

- Turnkey work-from-anywhere solutions for 24/7 access
- Real-time collaboration and centralized IT infrastructure
- Speed renderings of the most graphic intensive images
- Advanced security provides instant threat intelligence, analysis, & response
- Scale up powerful GPU-Accelerated desktops in minutes
- Built in Disaster Recovery & on-demand Business Continuity
- IronOrbit centralized IT management platform (IOCentral)

# Benefits

- Customization for Business Needs & Requirements
- Increased Productivity and Scalability
- Superb Performance and End-User Experience
- Secure & Compliant Infrastructure
- Reliable and Optimized for AEC User Profiles
- Cost Effective and Predictable Pricing Model
- A single robust dashboard to manage all your IT needs

## Full IT Control

User provisioning & Active Directory Management  
Multi-Cloud Capabilities (MS, 365, 2FA, and more)  
Online Ticket Management & Support

## Desktop Managed Services

Monitor desktop utilization (CPU/GPU/RAM/Disk)  
Reporting & Analysis 30-Day Summary  
Automatic Updates & Patching

## Server Managed Services

Monitor server utilization (CPU/GPU/RAM/Disk)  
Reporting & Analysis 30-Day Summary of Server Performance  
Automatic Updates & Patching

## Online Ticket Management

Open, close, and follow-up on your support tickets in real-time  
Speak directly with an expert technician via “Live Chat”

& Management**

**IronOrbit Central**, a powerful multi-cloud management portal, enables total control of your environment at your fingertips, all from a single pane of glass. The easy-to-use, intuitive interface provides complete management and monitoring of your information and communication environment.

# Security Solution

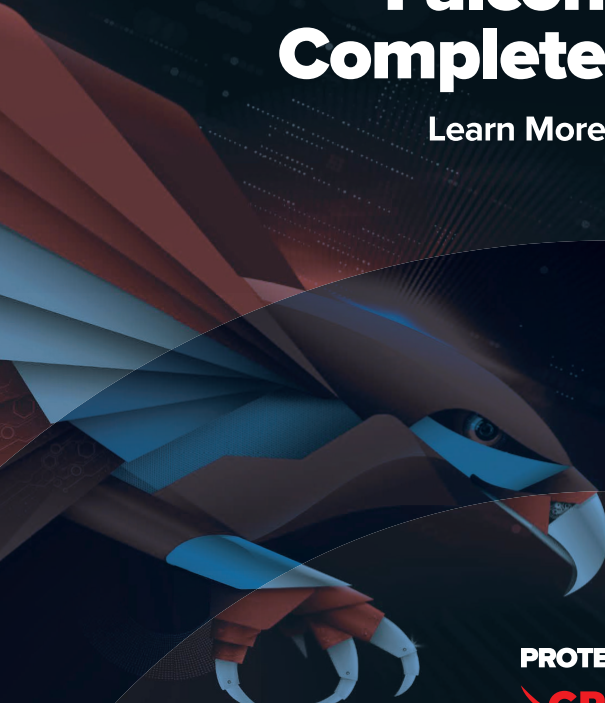

## **INFINITY Workspaces Secured by CrowdStrike's 24/7 Managed Service Program**

As an enhanced layer of security, IronOrbit integrated CrowdStrike's Falcon Complete platform with our INFINITY Workspaces to handle all aspects of endpoint security. This multifaceted protection system comes as a standard component with our Managed Services Program and INFINITY Workspaces offerings.

Imagine having multiple full-time expert incident responders conducting day-to-day monitoring of alerts to policy configuration, to full compromise remediation if necessary. All of this delivered with IronOrbit's 24/7 Managed Service Program.

# Falcon Complete
